

## Saronno-Seregno line reactivation

The works are aimed at reactivating and electrifying Saronno-Seregno line, and will mainly consist in modifying the route near Saronno with a 3.5-km alternative route, enhancing the railway station, upgrading track equipment, laying of a second track in the municipal areas of Saronno, Solaro, Ceriano L. and Cesano Maderno, removing existing level crossings, setting up signalling and telecommunication systems, repositioning stops and upgrading all railway facilities.

The call for tenders is currently underway.

The works – which may start after the approval of the executive project submitted by the contractor – shall be completed in 24 months.

Invested capital equals € 75 million.
