Accessibility statement

Gruppo FNM S.p.A. is committed to making its website accessible, in accordance with Legislative Decree No. 106 of 10 August 2018, which transposed EU Directive 2016/2102 of the European Parliament and of the Council. This accessibility statement applies to the website https://www.fnmgroup.it/.

Compliance status

This website is partially compliant with the requirements set out in Annex A to standard UNI CEI EN 301549 (WCAG 2.1) due to the cases of non-compliance and/or the exemptions listed below.

Non-accessible content

Non-compliance with Legislative Decree No. 106 of 10 August 2018:

- There are links without link text on single pages.
- On almost all pages, the contrast between text and background is too low.
- There are tables on single pages that have not been created correctly. Not all table data is assigned to table headers. It is not always clear which table content belongs to which table header.
- There are interactive elements on single pages whose names are not part of the caption. This makes it difficult to control the website using voice control.

Some PDFs are not accessible, but we are actively working to replace our remaining PDFs with accessible versions. If you need a specific file immediately, please contact us.

Preparation of the accessibility statement

This statement was prepared on 10/11/2026. The statement was drawn up on the basis of a self-assessment carried out directly by the service provider, in accordance with Article 3(1) of Commission Implementing Decision (EU) 2018/1523, with the support of Eye-Able technology by Web Inclusion GmbH. More information about Web Inclusion GmbH can be found at https://eye-able.com/.

The declaration was last verified on 01/11/2026.

Feedback and contact details

Do you have a comment or remark about the barriers on this website? Please contact us. We will explain to you what barriers exist and how we want to improve our digital environments. We will answer your questions as soon as possible. Thank you for your feedback. For more information, please contact the following address:

feedback-accessibilita@fnmgroup.it

In the email it will be necessary to indicate: Name and surname; Address of the web page or sections of the site or customer area subject to the report; Clear and concise description of the problem encountered; Tools used (operating system, browser, assistive technologies).

Enforcement procedure

In the event of an unsatisfactory response or no response within thirty days to a notification or request submitted under Article 7(1)(b) of Directive (EU) 2016/2102, the person concerned may submit a report to the Digital Ombudsman at AgID:

AgID

Number of employees with disabilities in the administration: 10

Number of workstations for employees with disabilities: 0

Disclaimer

The automatic check of the web content was carried out on: 10/11/2026. For the web content accessed by Eye-Able, the Google Chrome browser in version 136.0.7103.92 was used. We guarantee the accuracy of the information provided for the tested application version under the specified browser and operating system parameters. If different versions or environments are used, a different display is possible, which may differ from the results given here. For a complete check, manual tests by the website operator are also recommended. In accordance with the AgID Guidelines on the accessibility of services, Version 1.0 of 04.03.2026, par. 5.1 "Obligations of the service provider", and in line with Opinion No. 33/2026 of the Data Protection Authority, it is specified that the service provided adopts appropriate measures aimed at preventing any form of tracking – whether through its own systems or those of third parties – of tools, solutions, and usage settings that could be associated with the ways in which users access digital content. The service does not carry out profiling activities nor does it use web tracking techniques (such as, by way of example, cookies other than technical

cookies or fingerprinting techniques) capable of collecting information from which a user's disability condition could be inferred.
